Active Tray Crack Free For PC [2022-Latest]

Start Windows programs with a single mouse click! Active Tray Crack Mac is a FREE utility program that organizes your system tray and enables you to start Windows programs, folders or any other useful shortcuts with a single mouse click. The program can handle any kind of shortcut, including Internet websites, document files, folder shortcuts, command line or user-defined custom shortcuts. There is no need to set up any menus or to launch windows programs by hand, just right-click the tray icons and choose an action. You can even make use of the tray icons with a generic keyboard hotkey, so you can use Active Tray For Windows 10 Crack as a portable launcher with just a couple of steps. Manage Windows shortcuts using a free customizable window Active Tray Cracked Accounts shows all the available tray icons with a simple window, where you can sort them by group, system tray or anything you want. With a simple click, you can assign a shortcut for each item. If you are not sure about the shortcut you want to assign, just enter the name of the shortcut in the Search field and the application will be displayed. Once you select the right shortcut, you can click the Finish button to finalize the setting. By default, the window shows all the registered shortcuts. With the Show buttons on the top of the window, you can add, edit and manage any shortcut that is already in the system tray.

You can also delete shortcuts or move them using drag and drop. Configure the system tray according to your needs Active Tray Activation Code is a powerful and customizable tool that helps you to manage all the items in the system tray in a flexible and convenient way. You can create as many groups as you want, configure shortcut settings and apply groups to menu items. To save you time, Active Tray can automatically refresh the icons in the tray each time you start the system. PowerTools Suite... Quickly power up or down any USB device, Display, Sound card, Printer, CD-ROM and many more From PC to USB, You can easily power up or down any USB device with just a couple of clicks, making sure you will not waste your time on finding the right devices. In addition, you can do the same for displays, speakers, CD-ROMs and many more.

Requirements: · Windows 2000/XP/Vista · USB Plug and Play is ON · USB port is working properly

What's New in the?

Active Tray is a free utility that lets you enjoy the power of the system tray area without being overwhelmed by its many available functions. By adding hotkeys to the system tray area, you can launch applications, control the volume, switch the screen saver, hibernate and shut down your PC. Using Active Tray's menu shortcuts, you can easily access folders, documents, Internet URLs and tasks. The user interface is attractive and easy to use. In addition to manual customization, you can also create tray menus that contain your shortcuts. With Active Tray, you can also personalize the system tray by sorting and grouping icons. You can also remove unwanted icons, create multiple tray menus, or even rename and rearrange them according to your needs. Key Features:

- Create, manage and display menus in the system tray area, using drag-and-drop to add, remove or rename icons
- Create, manage and display cascading menus that host shortcuts to practically anything
- Rename and move system tray icons using simple mouse gestures, along with up to 9 hotkeys
- Manage system tray shortcuts with hotkeys using a customizable interface
- Configure Hotkeys to execute any system-related action, such as switching off the computer
- Easily customize the icons in the system tray area
- Quickly open documents, folders, documents, and websites using icons in the system tray area
- Sort, group and rename icons in the system tray area
- Built-in Internet Explorer (IE) search feature lets you search and open Internet Explorer favorites, such as websites, by clicking on an icon
- Save and load favorites in Internet Explorer's Favorites feature
- Create task shortcuts for frequent tasks such as controlling the volume, turning on and off the screen saver, hibernate or shut down the computer
- Create a cascading menu for your most commonly used folders, documents, documents, and websites
- Minimize to tray
